

QUICK START GUIDE

THIS GUIDE RELATES TO THE FOLLOWING STYLESHEETS:

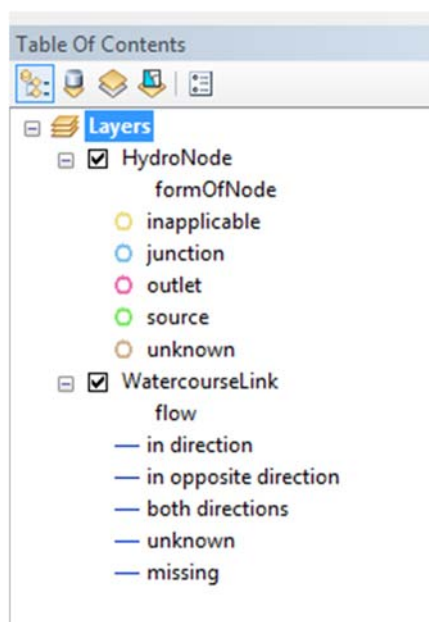

PRODUCT: OS OPEN RIVERS

DATA FORMAT: ESRI SHAPEFILE

STYLESHEET FORMAT: ESRI ARCMAP STYLESHEETS (LAYER FILES)

The stylesheets have been designed to work with the data as supplied

- 1 Either fork the stylesheets on [GitHub](#) or [download](#) them and navigate to the directory that matches your data format, stylesheet format and style preference.
- 2 Open a new blank map in ArcMap.
- 3 Click on the 'Add Data' button and navigate to the stylesheets folder and the directory that matches your data format and stylesheet format.
- 4 Select the layer file and click Add.
- 5 Your Layers window should now look like below. This is the recommended layer order.

- 6 Double-click on a layer to access the 'Layer Properties' window > select the 'Source tab' > click on 'Set Data Source...' > navigate to your OS Open Map Local data > select the data that matches the layer > select 'Add'

Your map should now look similar to this:

We recommend viewing the map between 1:1 000 and 1:200 000 for maximum legibility.

Compatibility notes

Our layer files are compatible with ArcMap versions 10.0 and above
